## **Our Vision**

### **Healthy People in Healthy Communities**

## **Our Mission**

**Promote health and prevent avoidable disease and injury by monitoring the health of our community, responding to public health emergencies, and assuring conditions in which people can be healthy**

## **Our Values**

- Careful, open and fair consideration of the concerns and cultural values of all people;
- Excellence in science, communications, collaboration, and operations;
- Timely, effective, professional, and confidential customer service;
- Wellness, healthy lifestyles, and a safe and healthful environment; and
- Partnerships with private and other public organizations within our community

## **The Ten Essential Public Health Services**

1. Monitor community health status to identify health problems;
2. Diagnose and investigate health problems and health hazards in the community;
3. Inform, educate, and empower people about health issues;
4. Mobilize community partnerships to identify and solve health problems;
5. Develop policies and plans that support individual and community health efforts;
6. Enforce laws and regulations that ensure safety;
7. Link people to needed personal health services and assure the provision of health care when otherwise unavailable;
8. Assure a competent public health and personal health care work force;
9. Evaluate effectiveness, accessibility, and quality of personal and population-based health services; and
10. Research for new insights and innovative solutions to health problems.
